

Preparing for you Design Consultation

Our mission is to use our experience to develop a meaningful, useful, organized space in your home. You have taken the first step by scheduling a free in-home design consultation with Austin-Morgan Closets. In order to achieve the best outcome with your custom organization solution, we need to know more about you and your lifestyle. The best way to assess your needs is by having you take a personal inventory of your space and identifying those items you plan to store in this space and how you would like to store them. Don't worry if you don't have all these questions answered, we will help you assess your needs and define the right solution during our consultation.

Please give some thought to the following questions:

As you look at the items that have accumulated in your home, what items are necessary, important, pretty, unnecessary or obsolete?

What is your personal style? When you look through our gallery of photos on www.AustinMorganClosets.com what appeals to you? Are there any styles, finishes or features that you must have?

Is there a budget and time frame that needs to be considered to make this project successful for you?

It is very important to the success of a project that everyone involved is able to attend the design consultation. If they are unable to attend the meeting, have them complete the personal worksheet to help incorporate their needs and provide the additional information we need.

We will discuss these questions and more with you as we determine how Austin-Morgan Closets can transform your space to better fit your needs.

Thank you

It has been a pleasure to introduce you to Austin-Morgan Closets, and we thank you for this opportunity to be of service. Our primary goal is to help you find a solution that is perfectly tailored to your needs, and we are confident you'll find Austin-Morgan Closets to be a true partner with you through the process. We look forward to working with you.

Bedroom Closet

Your personal profile

Use this guide to inventory your storage area so we can create the system that's just right for you and your belongings. Count number of items or measure the number of inches each item occupies.

Name: _____

Male	Height	Female	Height	Child	Age
------	--------	--------	--------	-------	-----
